

TECHNI

SLIM LINE INTEGRAL
CARTRIDGE EDUCATOR

360° ABRASIVE INLET ROTATION

MAXIMIZED WEAR LIFE

GREATER CUTTING SPEEDS

PRECISION MULTI-AXIS CUTTING

SUPERIOR EDGE QUALITY

OPTIMIZED JET STREAM ALIGNMENT

HEAVY DUTY LONG LASTING DIAMOND INSIDE

ABRASIVE INLET

- 360° abrasive inlet rotation, makes Tech-Head capable to align with any abrasive tube location. Cutting head replacements have never been easier.
- 30° abrasive inlet angle, designed for efficiency and versatility with multi-axis system such as Techni PAC60™.

FROM THE TRUSTED WORLD LEADER

INTERNAL GEOMETRY

- Enhanced internal design with wear resistant, carbide insert maximizes particle entrainment into the jet stream.
- Mixing chamber, engineered to accelerate garnet particles to their highest velocity.
- PACT™ (Precision Aligned Cartridge Technology) is a revolutionary technology that ensures true alignment of the jet stream from the integral orifice through the entire cutting head assembly.

SLIMLINE DESIGN

- Sleek, compact external geometry and lightweight design.
- Slimline design and incredibly tight tolerances make Tech-Head the best choice for steep angle cutting.

HEAVY DUTY DIAMOND

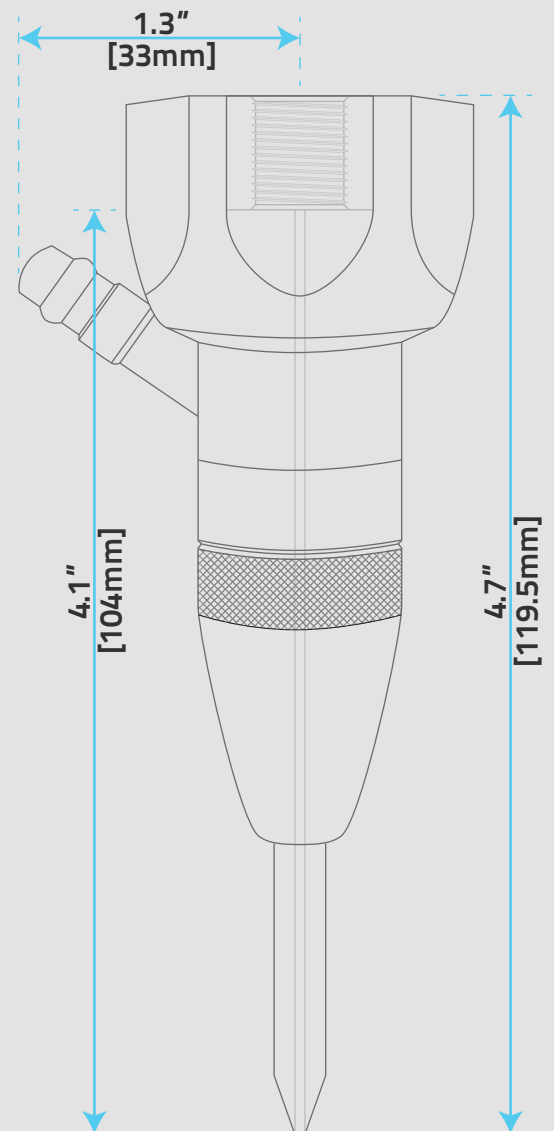

PERFECT ALIGNMENT

Through the whole cutting head

IMPRESSIVE AVERAGE LIFE

500 to 1,000 hours and above
