**IMPORTANT NOTICE:**
The technical data is not binding and may be changed by Techni Waterjet without prior notice. All the above accuracy tolerances are correct at the calibration temperature of 20° ± 1° C.

*Linear/Axis/Meter

---

Machines displayed in the present catalogue are without safety barriers in order to ensure the perfect vision of all the details of the machine.

**Intec™G2 613**

**HIGH-PRESSURE WATERJET SYSTEMS**
STANDARD FEATURES

BREAK AWAY HEAD
Should the cutting head inadvertently crash into a clamp/fixture, hit the edge of a work piece or an upturned part, the Break Away Head will detect the crash and automatically stop the machine.
Not available with PAC60.

SERVO Z AXIS
Servo Z axis with auto height position recall, laser terrain mapping (optional) and edge location optics.

WATER RAISE AND LOWER
Automatic water Raise/Lower at the push of a button for quieter, cleaner and safer submerged cutting; our tanks include air-tight welds of an air chamber which uses regular shop air pressure.

VAF AND TECH-SENSE™
Tech-Sense™ Monitoring System enables true unattended operations. Should the cutting be disrupted the machine will pause the program which can be easily resumed. With our variable feeder, garnet supply is adjusted by the software.

ABRASIVE PUMP AND HOPPER
The hopper includes a clear pump chamber to ensure abrasive is present and flowing correctly. Here is where the abrasive is pressurized, allowing the lid to be opened at any time.
Standard 500 Kg / Optional 2000 Kg

REMOTE CONTROL PENDANT
The MPG allows to manually wind forward or backward through a cutting path. This enables the operator to find the exact point along a cutting path from which to re-start cutting after a stoppage, or to simply locate a pre-cut part.

ELECTRIC SERVO PUMP - Patented
Quantum®
The Quantum® pump incorporates core “direct servo” technology that was first applied by NASA for the Space Shuttle Program.

VP 15/52
- MAX OUTPUT PRESSURE 3585 bar (52,000 psi)
- MAX OUTPUT VOLUME 1.9 l/min (0.5 gpm)
Output Volume Based on 480 VAC Electrical Supply

ESP 37/66
- MAX OUTPUT PRESSURE 4550 bar (66,000 psi)
- MAX OUTPUT VOLUME 3.8 l/min (1.0 gpm)
Output Volume Based on 480 VAC Electrical Supply

PAC60™ - Patented
The PAC60™ operating software incorporates the True Cut algorithms data base, developed to determine the predicted taper at a given surface finish. This taper is then compensated for when cutting the part, anywhere from 0 to 60 degrees, giving you “Precision Angle Control” of any part that can be produced on an X-Y abrasive waterjet cutting machine.

- Cutting parts with a true angle up to +/- 60 degrees with continuous rotation.
- Patented Technology to reduce cutting time significantly.
- Complex 5-Axis Programming made easy and quick to learn.
- Surface Scanner to maintain constant distance between nozzle and workpiece when cutting uneven slabs.
- Positioning accuracy to ±0.1 degrees.
- Multi-pass cutting for edges with different angle.
- Taper cutting automatic compensation.
